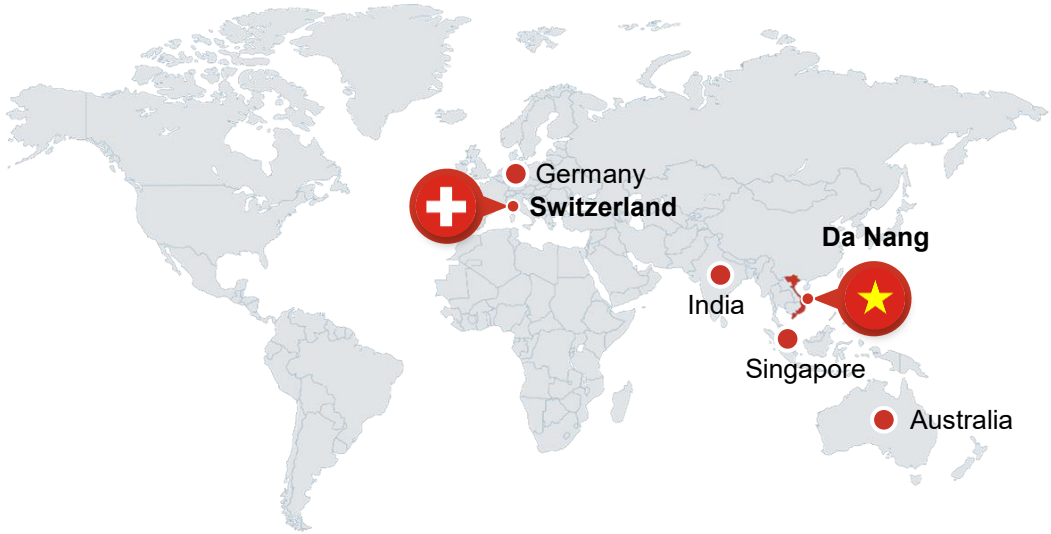
About Us

United in purpose, committed to **delivering excellence** for our customers.



150+
Global projects delivered successfully

12+
years of **experienced** team

100
Percentage of engineer fluent in **English communication** and **comprehension**

2
Delivery locations in **Vietnam** and **Switzerland**

80+
Highly skilled engineers, developers, and cross-functional **specialists**

29.5
average age for a team that's **energetic,** adaptable, and **quick to innovate**

Our Expertise

We **partner** with our clients to solve the **complex** technology challenges.

Digital ecosystems & experiences

New business (B2B)
Customer experience (B2C)
Employee experience (B2E)

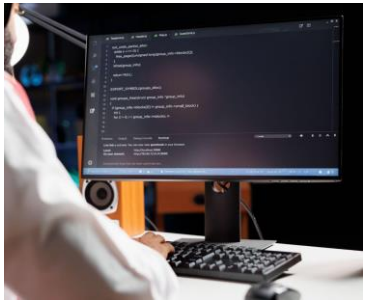
Innovative technologies

Applied AI & data solutions
Modern architectures
IT automation

Technology organization

Technology organization
Solution software factory
Data governance
Digital organization

Full-cycle Software Development



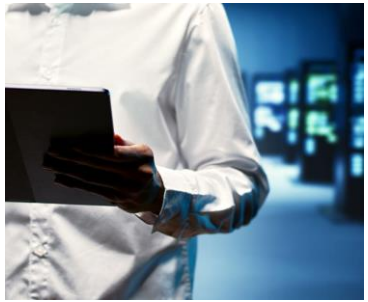
We develop Web apps, Mobile Apps, Customer Portals and Business Applications to your audience. Our expertise also covers R&D Services, Software Maintenance, Integration, and Team Augmentation.

- AI-based solutions
- Salesforce optimization

DevSecOps Consulting & Automation

We provide DevOps services like CI/CD automation, infrastructure management, monitoring, testing, security, and support.

Quality Assurance & Testing services



We ensure software excellence through comprehensive Quality Assurance services, including testing, automation, and performance optimization.

Our Philosophy

To ensure a **successful project** delivery, we need to make sure that we have a shared **vision** for the product, along with the definition of a delivery strategy.

Shared governance and vision

- Define the Roles and responsibilities
- Define the RACI matrix
- Think the purpose of the monthly steering
- Define the governance of the project

Testing strategy

- Define the automated testing strategy & coverage
- Define the manual testing strategy
- Run the UAT scenarios at each sprint (of the sprint scope)

Coding standards

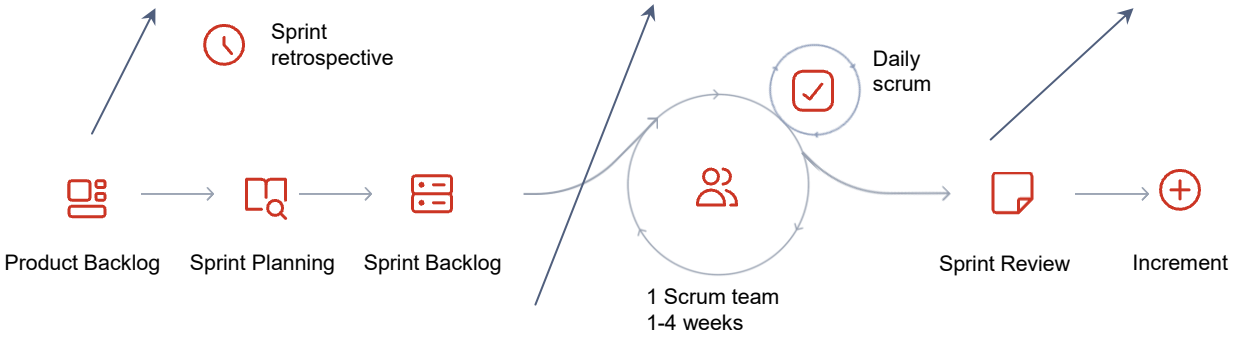
- Continue to follow the coding standards
- Enable blocking PRs with both Sonar and Snyk
- Make sure to update the coding standards periodically

Software foundry standards

- Harmonize the testing environments
- Harmonize the hosting
- (Re)Define the best practice tooling chain (App Insight, etc.)

Our approach

Our **development** approach follows **agile** principles



Principles followed in any development stream

- **Agile development** methodology
- **Short iterations**
- **Regular product increments**
- **Daily interactions & regular feedback** loops with stakeholders & users

If multiple streams are running in parallel

- **Overall sprint** planning & retrospective
- Inter-stream **coordination meetings**
- Regular loops with **Executive Committee**

Our Playground

Our development toolkit **bridges the gap between** customer ideas and outstanding applications.

Mobile	JavaScript Web frameworks	Processing & Logic	Integration & Persistence	Productivity & Tools	DevOps
iOS	ANGULAR	spring	MariaDB	Jira	docke
android	React	Microsoft .NET	PostgreSQL	Jenkins	kubernetes

Why us?

We are a **Swiss-origin** trusted technology partner, connecting and empowering organizations with top software experts and technology for faster, **sustainable success**.

Proven methodology

With over a decade of experience, our proven methodology has powered the success of numerous innovative technology projects.

Certified excellence

We excel at navigating regulated industries, delivering secure and sophisticated solutions – validated by our certifications.

ISO 27001 ISO 13485

Long-term partner

We build collaborative & lasting relationships with our clients, while serving them with passion, integrity & honesty.

Strong partnerships & secure ecosystem

We are a dependable and reputable partner with extensive expert connections, driving innovation and excellence across all projects while adapting swiftly to evolving industry needs.

Cost-efficient & full ownership

We advise you in your best interest to make cost-efficient decisions, giving you full control over your solutions & its codebase.

Swiss-origin with global reach

As a Swiss-origin software development hub, we combine local expertise with strong offshore capabilities in Vietnam. Wherever our clients go, we follow – delivering Swiss-quality solutions worldwide.

We can fix

Software development can be complex and expensive for companies for which it is **not their core business.**

Lack of methodology

Managing a development project and team requires a structured approach formulated in a methodology. This helps reducing fraction, limiting overhead, and accelerating decision making.

Scarcity of resources

Keeping a project on time and budget requires to use the right resources to their maximum potential. Sourcing is the fuel of all successful development project.

High cost per feature

From its original idea to its utilization by user, a feature has a cost mostly impacted by the effort invested in developing and testing the feature to a production ready state.
